

NEW PRODUCT RELEASE

TOUR & TRAINING radio system

- Used in site/plant tours, training scenarios and executive presentations, the Tour & Training Radio System provides clear and continual communication in high noise environments.

- The Leader unit can be heard by an unlimited number of Listeners within a 100 ft range and easily identifiable in hi-vis yellow.

- Our headsets are durable and water resistant with the Leader headset featuring an Electret noise cancelling gooseneck boom mic with windscreen for optimal clarity and flexibility.

- Dual speakers and high quality FM provide exceptional, crisp intelligibility. The lightweight ear cups provide consistent, comfortable protection with adjustable headstraps for day long wearing comfort and a secure fit under a hardhat or helmet.
